**SMART4ALL** is a H2020 funded project (Grant Agreement No. 872614) that builds capacity amongst European stakeholders via the development of self-sustained, cross-border experiments that transfer knowledge and technology between academia and industry. It targets Customised Low-Energy Computing (CLEC) for CyberPhysical Systems (CPS) and the Internet of Things (IoT) and combines a set of unique characteristics that join together under a common vision different cultures, different policies, different geographical areas and different application domains. The SMART4ALL consortium is led by the University of Peloponnese (Greece) and is composed of 25 partners from Central, South and Eastern Europe.

**SMART4ALL** will design and implement 3 types of cross-border Pathfinder Application Experiments (PAEs):

**1) Knowledge Transfer Experiments (KTE)**, which comprises of novel types of internship experiments allowing smaller projects, or less mature ideas to be presented, tested and thus potentially find the fertile ground to grow and reveal its product potentials;

The KTEs are a short-term (3 months) internship projects between two different entities from two different Countries : one Academic/Industrial partner who act as Sending Organization and one Academic/Industrial partner who act as Host Organization. ([see more details here](#))

**Apply to our First Knowledge Transfer Experiments Open Call:**

Starts on	April 15th, 2020 at 00:00 CEST
Ends on	July 15th, 2020 at 13:00 CEST
