# Selection Process Overview

# Evaluation Criteria – CTTE

Criteria	Description
<b>Excellence</b>	<b>Ambition:</b> to what extent the proposed experiment is beyond the <b>State-of-the-Art</b> and what is the <b>innovative approach</b> behind it (e.g. ground-breaking objectives, novel concepts and approaches, new products, etc.)
	<b>Innovation:</b> level of innovation within their market and degree of <b>differentiation</b> that the experiment will bring.
	<b>Soundness of the approach:</b> objectives of the proposed experiment to be clearly defined, relevant and aligned with the SMART4ALL project objectives, verticals and competence fields. Elevation of TRL clearly justified.
<b>Impact</b>	<b>Benefits of the collaboration,</b> in terms of technical and/or business/market expectations, and to what extent this particular collaboration will lead to a successful experiment and high economic impact.
	<b>Market opportunity:</b> demonstrate whether the new/improved product has market potential, e.g. because it solves a problem for a specific target customer.
	<b>Competition analysis</b> for the experiment product/service and if the proposal is disruptive and breaks the market.
	<b>Commercial Strategy and Scalability:</b> How the experiment is scalable and able to be commercialised to solve a structural problem in a specific sector/process/etc., using convincing business model and projections.
<b>Implementation</b>	<b>Work plan:</b> clearly described and fully aligned with the objectives, including Work packages, tasks and responsible partners. The time plan should be realistic and achievable, coherent and effective.
	<b>Team:</b> Management and leadership qualities; balanced and cross-functional.
	Quality and effectiveness of the <b>resources</b> assigned in order to get the objectives/deliverables proposed. <sup>10</sup>
